## **1. INTRODUCTION**

### **1.1 Purpose of DFCC's Sustainable Bond Framework**

**DFCC Bank PLC ("DFCC" or "the Bank")** has established this Sustainable Bond Framework ("the Framework") that will hereafter serve as a reference document for any future issuance of Green, Social, Sustainability, Sustainability-linked and/or any other Sustainability-labeled products or financial instruments offered by the Bank.

This Framework builds on the internal methodology we have used to report on our sustainable financing commitment and promotes our efforts to remain aligned with industry guidelines and market practice. In this regard, we have refined the definitions and eligibility criteria previously used in DFCC's Sustainable Bond Framework to further align with the best market practices and extend the range of eligible categories.

This Sustainable Bond Framework will supersede and replace the "Sustainable Bond Framework" initially created and published by the Bank in November 2025 and will be applicable from December 2025 onwards.

### **1.2 Who We Are**

DFCC Bank PLC was established in 1955 as Sri Lanka's pioneer Development Finance Institution. As its shares were listed in 1956, it is also the oldest listed bank in Sri Lanka. While DFCC was set-up by the Government of Sri Lanka, majority ownership has always been with the private sector. In 2015, the DFCC merged with its subsidiary - DFCC Vardhana Bank, and became a 'Licensed Commercial Bank' providing a full gamut of banking services. With its vision "to be the leading financial solutions provider sustainably developing individuals and businesses", DFCC is committed to the promotion of sustainable development.

DFCC is the pioneer financier of the private sector Renewable Energy (RE) Sector in Sri Lanka, financing the country's first grid connected mini hydro-power project in the mid 1990's and co-financing the first grid-scale wind, solar and waste-to-energy projects. The bank implemented two World Bank & Global Environment Facility funded RE projects, which are widely hailed to have transformed the energy sector landscape in Sri Lanka.

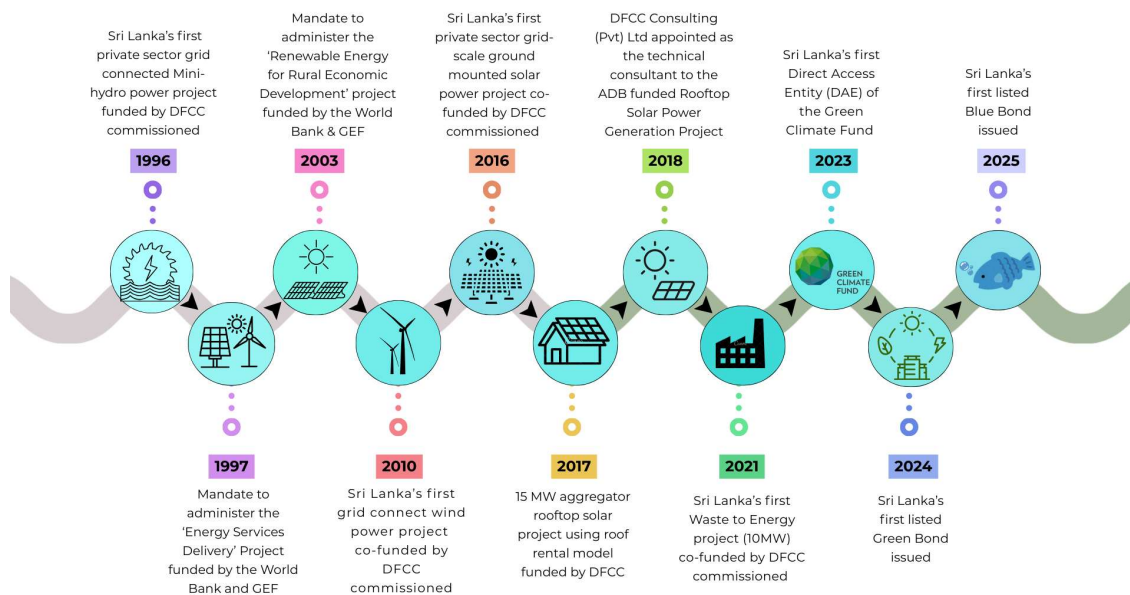

Figure 1: DFCC Bank's Green Financing Journey

In July 2023, DFCC became the first organization in Sri Lanka to be an Accredited Entity of the **“Green Climate Fund”<sup>1</sup> (GCF)**. The GCF, set up under the UNFCCC, is the world’s largest fund for climate action. DFCC is accredited to design and implement projects/programmes with a value of up to USD 250 million using a mix of loans, equity and guarantees. The Bank has also been a pioneer in green financing in the country’s capital markets, being the first to issue a Green Bond in September 2024 and also a Blue Bond in November 2025.

DFCC is an initial signatory to the eleven **“Sustainable Banking Principles”<sup>2</sup>** of the **Sri Lanka Banks’ Association (SLBA)** under its **Sustainable Banking Initiative (SBI)** and is committed to adopting these Principles in its operations.

### 1.3 Our Vision and Strategy for Sustainability

In 2020, the DFCC developed and obtained Board approval for its first formal Sustainability Policy, Strategy and Plan for the period 2020 to 2030 (the ‘Sustainability Strategy’). This was further improved in 2025 and the main features of the current Board approved DFCC Sustainability Strategy is depicted in Figure 2 below:

<sup>1</sup> <https://www.greenclimate.fund/>

<sup>2</sup> <https://sustainablebanking.lk/>

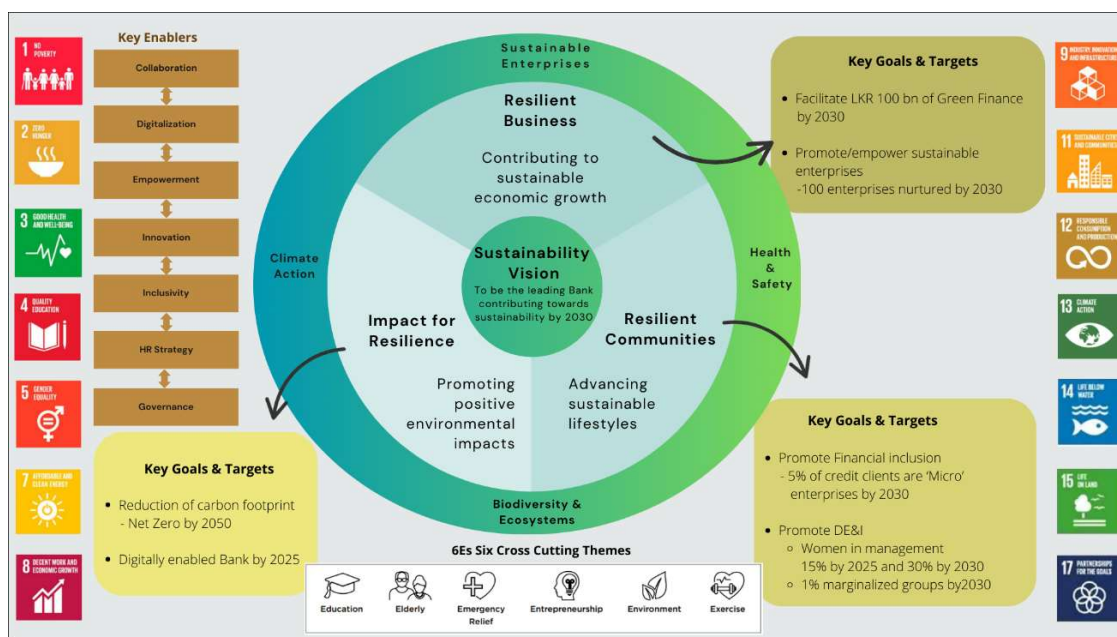

Figure 2: DFCC Sustainability Strategy

One of the three focus areas under the Sustainability Strategy is “**contributing to sustainable economic growth**”, with key goals and targets of promoting sustainable and green finance, as well as promoting and empowering sustainable entrepreneurs.

#### 1.4 Environment, Social and Governance (ESG) Policy

The Board of DFCC Bank approved an **Environment, Social and Governance (ESG)** Policy in October 2025. The primary objective of this policy is to articulate how DFCC integrates ESG considerations into its decision making and operations to effectively manage environmental and social risks and impacts and improve outcomes when carrying out its business activities. The policy serves as the foundation within which the Sustainability Strategy, and the objectives and procedures of the Bank’s **Environmental and Social Management System (ESMS)**, described in section 1.5 below, are anchored.

The Bank is also preparing for adoption of the new Sri Lanka Financial Reporting Standards – SLFRS S1 (General Requirements for Disclosure of Sustainability-related Financial Information) and SLFRS S2 (Climate-related Disclosures).

#### 1.5 Governance Structure

The **Executive Sustainability Management Committee (ESMC)** headed by the Chief Executive Officer (CEO) is responsible for driving the DFCC Sustainability Strategy. There are various task forces established under the ESMC, such as the Green Finance Task Force and the Sustainable Entrepreneurship Task Force that report to it. The Green Finance Task Force is responsible for enabling the achievement of the Bank’s ‘Green Finance’ targets.

The **Sustainability Department (SD)** of the Bank is responsible for implementing the Sustainability Strategy and the ESMS. It reports on the implementation of the Sustainability Strategy to the ESMC and to the Board of Directors through the Board Integrated Risk Management Committee (BIRMC) on a periodic basis.

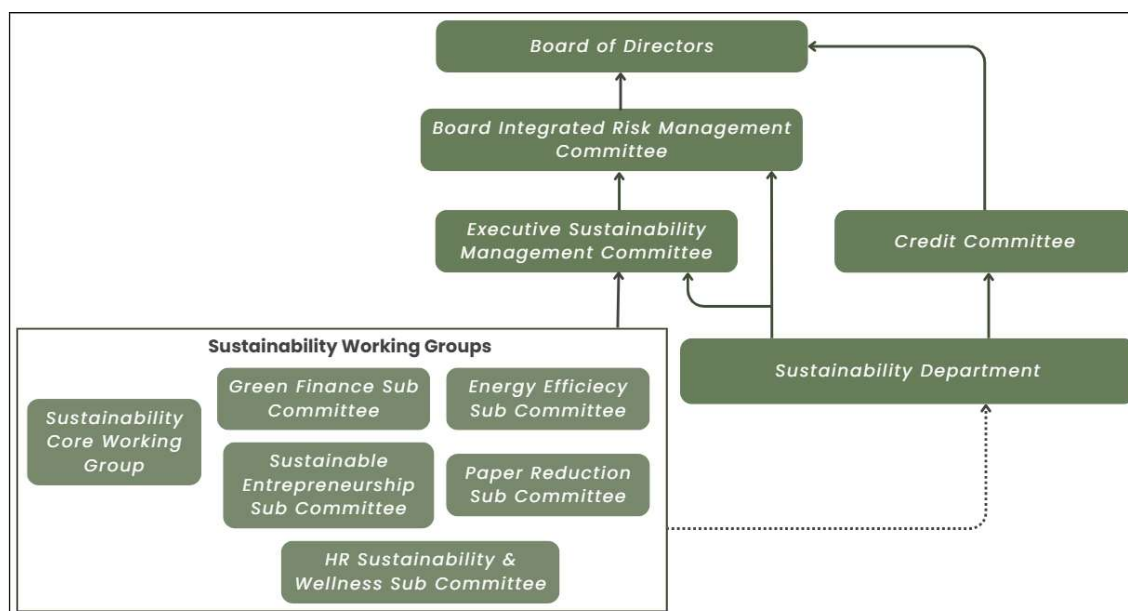

Figure 3: Sustainability Governance Structure

## 1.6 Environmental and Social Management Systems (ESMS)

DFCC's major Environmental & Social impacts (E&S) tend to be indirect, arising from the provision of financial facilities to sensitive projects in various sectors. Some otherwise beneficial projects can create unfavorable impacts on both the environment and society and expose the bank to several risks. In this regard, the bank has a comprehensive **Environmental & Social Management System (ESMS)** in place to ensure E&S aspects are an integral part of project appraisal and follow up activities. The design of the ESMS incorporates all **eight IFC Performance Standards (PS)**<sup>3</sup>.

## 2. DFCC'S SUSTAINABLE BOND FRAMEWORK

### 2.1 The Framework

The Sustainable Bond Framework sets out a roadmap for the issuance of Sustainable Bonds by DFCC encompassing green, blue, social, gender, sustainability, and sustainability-linked loans financing bonds. It provides clear guidance on the use of proceeds to fund eligible 'green' and/or 'social' projects as well as sustainability-linked loans initiatives.

Sustainability-Linked Loan Financing Bonds (SLLBs) are use-of-proceeds instruments where an amount equal to the net proceeds is allocated exclusively to (re)finance a portfolio of eligible Sustainability-Linked Loans (SLLs). The underlying SLLs are general corporate purpose loans whose financial characteristics are linked to the borrower's achievement of predefined, material, and ambitious sustainability performance targets (SPTs), measured through selected Key Performance Indicators (KPIs). The environmental and/or social contribution of SLLBs is derived from the aggregated sustainability performance improvements of the underlying loan portfolio rather than from the financing of specific eligible projects.

<sup>3</sup> <https://www.ifc.org/en/insights-reports/2012/ifc-performance-standards>

This framework establishes the foundation for identifying, selecting, verifying, and reporting eligible sustainable financing opportunities that can be directly or indirectly financed through DFCCs' Sustainable Bonds (which include green, blue, social, gender, sustainability, and SLLBs), and outlines the mechanisms for managing the associated proceeds.

## 2.2 Sustainable Financing and SDGs

DFCC will contribute to the following set of United Nations **Sustainable Development Goals** (SDGs) through the projects and assets financed through the issuance of instruments governed by this Sustainable Bond Framework:

## 2.3 Structure, Guiding Principles and Standards

DFCC's Sustainable Bond Framework is based on the **Green Bond Principles (GBP)** (June 2025)<sup>4</sup> and **Bonds to Finance the Sustainable Blue Economy: A Practitioner's Guide** (September 2023)<sup>5</sup> and **Social Bond Principles (SBP)** (June 2025)<sup>6</sup> and **Bonds to Bridge the Gender Gap: A Practitioner's Guide to Using Sustainable Debt for Gender Equality** (November 2021)<sup>7</sup> and **Sustainability Bond Guidelines (SBG)** (June 2021)<sup>8</sup> issued by the International Capital Market Association (ICMA), and the **Guidelines for Sustainability-Linked Loans financing Bonds (SLLBG)** (June 2024)<sup>9</sup> issued by both the **Loan Market Association (LMA)** and **ICMA**, and the **Sustainability-Linked Loan Principles (SLLP)** (March 2025)<sup>10</sup> published by the **Loan Syndications and Trading Association (LSTA)**, **Asia-Pacific Loan Market Association (APLMA)** and **Loan Market Association (LMA)** which provide guidelines in the following key areas:

- Process for Project Evaluation and Selection
- Management of Proceeds
- Reporting

And for heightened transparency:

- External Review

## **2.4 Framework Governance**

The Sustainable Bond Framework may be further updated and expanded as the GBP, SBP, SBG and SLLBG market practices evolve. This framework will be applied to any green, blue, social, gender, sustainability bond, or any sustainability-linked loans financing bond issued by DFCC.

## **2.5 Use of Proceeds**

Under this Framework, the Bank may issue the following types of bonds:

- Green Bonds where an amount equal to the net proceeds will be exclusively used to (re)finance eligible expenditures falling within the Eligible Green categories. These encompass investments aimed at mitigating climate change, adapting to its impacts, conserving natural resources, protecting biodiversity, and preventing or controlling pollution. All identified Green Projects must demonstrate tangible environmental benefits, which should be evaluated and, where possible, measured.
- Blue Bonds (i.e., a sub-category of 'Green') where an amount equal to the net proceeds will be exclusively used to (re)finance eligible expenditures falling within the Eligible Blue categories. This refers to sustainable ocean-based industries that promote economic growth while safeguarding aquatic ecosystems and enhancing access to clean water. It also includes investments in ocean health through ecosystem and natural resources management, pollution control for marine and coastal environments, including the rivers that drain to the ocean, and/or sustainable coastal and marine development and clean drinking water infrastructure. Eligible proximity of the project site to the ocean, rivers that drain to the ocean and/or the marine environment are described, where appropriate.
- Social Bonds where an amount equal to the net proceeds will be exclusively used to (re)finance eligible expenditures falling within the Eligible Social categories. These are initiatives designed to address specific social issues or deliver positive outcomes for communities. Project categories include affordable basic infrastructure, access to essential services, employment generation, food security and sustainable food systems, and socioeconomic advancement and empowerment.
- Gender Bonds (i.e., a sub-category of 'Social') where an amount equal to the net proceeds will be exclusively used to (re)finance eligible expenditures falling within the Eligible Gender related categories. These are investments specifically aligned with advancing gender equality and women's empowerment. Eligible projects include initiatives that support socioeconomic advancement and empowerment, and women empowerment.
- Sustainability Bonds where an amount equal to the net proceeds will be exclusively used to (re)finance eligible expenditures falling within both Eligible Green and Social categories (including Blue and Gender subcategories)

- Sustainability-Linked Loans Financing Bonds (SLLBs) are instruments where an amount equal to the net proceeds will be exclusively used to (re)finance, in part or in full, a portfolio of Eligible Sustainability-Linked Loans (SLLs). This portfolio may include term loans, project loans, and revolving credit facilities whose economic terms can change based on the borrower's achievement of ambitious, material, and measurable sustainability performance targets. These loans are selected based on predefined sustainability or ESG objectives and are evaluated through Key Performance Indicators (KPIs), assessed against Sustainability Performance Targets (SPTs). SLLBs are forward-looking, performance-based instruments, and their proceeds are intended for general corporate purposes rather than specific projects. In line with SLLBG, the proceeds of SLLBs are not allocated to specific projects. Instead, the sustainability impact is achieved through improvements in the borrower's overall sustainability performance.

SLLs financed or refinanced under this Framework are structured such that their economic characteristics are linked to the borrower's achievement of predefined SPTs. Typically, this linkage takes the form of an adjustment to the loan's interest margin, whereby achievement of the agreed SPTs results in a reduction in the applicable interest rate, and failure to achieve the targets may result in a margin increase or forfeiture of the incentive. The magnitude and structure of the pricing adjustment are determined on a case-by-case basis, taking into account the borrower's sector, credit profile, and the ambition of the selected targets. This mechanism is intended to create a direct financial incentive for borrowers to improve sustainability performance while maintaining alignment with prudent credit risk management.

- GSS+ Bonds refer to a broad category of thematic bonds that includes Green, Blue, Social, Gender, Sustainability, and SLLBs. These bonds are issued to raise capital for activities and projects that generate positive environmental and social impacts.

DFCC intends to allocate the amount equal to the net proceeds of the Green, Blue, Social, Gender, Sustainability and SLLBs issued under this framework to finance or refinance new and existing loans (see section 3 on Management of Proceeds). Eligible expenditure would include investments, activities and other related and supporting expenditures, such as construction of new assets, as well as maintenance, enhancement, improvement or repair of existing assets. The eligible sustainable loans and SLLs are to be funded in whole or in part by an allocation of the bond proceeds. In addition, the Bank will be able to finance eligible green, social and SLL cross-border portfolio projects through the financial provisions of a Green/Blue/Social/Gender/Sustainability/SLLB. Eligible projects shall comply with the thresholds outlined in the Sri Lanka Green Finance Taxonomy (May 2022)<sup>11</sup> and remain aligned with any future developments<sup>12</sup> in the country to ensure continued relevance and compliance, except for SLLs, where compliance will be based on relevance.

The eligible main category, use of proceeds, type of Bond, expected outcome and the indicative impact reporting indicators with respect to Green, Blue, Social, Gender, Sustainability Bonds are presented in Table 2.5.1 below:

<sup>11</sup> [https://www.cbsl.gov.lk/sites/default/files/cbslweb\\_documents/sl\\_green\\_finance\\_taxonomy.pdf](https://www.cbsl.gov.lk/sites/default/files/cbslweb_documents/sl_green_finance_taxonomy.pdf)

## Notes

1. **Abbreviations**  $CO_2$  = Carbon Dioxide, GBA = Gross Building Area, GHG= greenhouse gas, GJ = giga joules, GSTC = Global Sustainable Tourism Council, GWh = Gigawatt-hour, ha = Hectare, kW = kilowatt, KWh = kilowatt hour,  $km^2$  = Square kilometer, LNG = Liquefied natural gas,  $m^2$  = square meter,  $m^3$  = cubic meter,  $m^3/a$  = cubic meter per annum, MW = Megawatt, MWh = Megawatt hour,  $tCO_2e$  = ton of carbon dioxide equivalent, terajoule, NSTC - National Sustainable Tourism Certification (NSTC) by SL Tourism Development Authority
2. **GHG accounting methodology and assumptions will be disclosed (see section 4.2 Impact Reporting)**
3. **All qualitative information mentioned here will be disclosed based on the data availability (see section 4.2 Impact Reporting)**
4. **All eligible projects will be selected through the screening procedures of the DFCC ESMS (see section 2.6 Process for Project Evaluation and Selection)**
5. **The SLGFT linkage outlined herein are indicative and not exhaustive, and may be revised or expanded as necessary**
6.  - Green Bond  - Social Bond  - Sustainability Bond  - Blue Bond  - Gender Bond

## **Sustainability-Linked Loans Financing**

SLLBs seek to advance performance-based lending and uphold rigorous standards within sustainable finance markets. With the objective to reduce climate change impacts, the instrument complements DFCC's sustainability strategy and lending portfolio by targeting:

- Borrowers in hard-to-abate or other decarbonisation-critical sectors, where operational transition is more impactful than asset-specific financing;
- Borrowers whose sustainability objectives primarily depend on improvements across their value chain rather than significant investment in fixed assets;
- Borrowers aiming to enhance sustainability performance in other material areas relevant to their operations.

In line with the core components of the SLLBG, the selected KPIs, and the calibration of SPTs for qualifying SLLs, based on their relevance, materiality, measurability, bench markable nature, and level of ambition, under SLLBs are presented in Table 2.5.2 below. DFCC will ensure that the selected portfolio of SLLs demonstrates a high level of ambition, relevance to the borrower's core business, and consistency with internationally recognised climate pathways (where applicable). Measures will be in place to ensure that there is no double counting of assets within a SLLB. Specifically, where a loan contains both green/social and sustainability-linked components and is already included as an eligible green/social/sustainability asset for DFCC's Green, Social, or Sustainability Bond, it will not be counted again under a SLLB.

### **Selection of Key Performance Indicators**

GHG emissions reduction has been selected as the primary Core KPI for eligible SLLs under this Framework due to its strong relevance, materiality, and measurability across a wide range of sectors in which DFCC operates. As climate change mitigation is a strategic priority, GHG emissions provide the most direct indicator of a borrower's contribution to transition outcomes. GHG metrics are particularly material for energy-intensive, manufacturing, transport, infrastructure, agribusiness, and other decarbonisation-critical sectors, where operational improvements and transition strategies can generate significant environmental impact. The selection of GHG-related KPIs enables DFCC to align SLLs with internationally recognised climate pathways, including the goals of the Paris Agreement, and to support borrowers in transitioning toward lower-carbon business models. GHG emissions data are also well-established, supported by recognised accounting standards support reliable baseline setting, benchmarking, and monitoring, with both absolute and intensity-based measures applied as appropriate. In addition to Core GHG KPIs, DFCC may adopt Secondary KPIs addressing other material ESG factors critical to the borrower's sustainability profile and transition strategy.

### **Calibration of Sustainability Performance Targets (SPTs)**

For each eligible SLL, DFCC will establish a clear and transparent baseline, against which SPTs are calibrated. Baselines will typically be derived from the borrower's most recent verified historical data, generally covering one to three years prior to loan origination, depending on data availability and sector characteristics. Where historical data is limited, DFCC may accept a clearly justified proxy or reference year, subject to enhanced scrutiny. DFCC's assessment of the SPT ambition is conducted through a structured internal review process in accordance with the supplementary internal process document established under the framework. This assessment considers:

- Materiality – whether the SPT addresses a sustainability issue that is fundamental to the borrower’s core business;
- Benchmarking – comparison of proposed targets against relevant peer performance and/or sector pathways and/or regulatory expectations and/or, where applicable, science-based or internationally recognised climate trajectories;
- Historical performance – evaluation of the extent to which the SPT represents a meaningful improvement over the borrower’s past performance;
- Forward-looking ambition – confirmation that targets go beyond business-as-usual and reflect a credible transition pathway rather than incremental efficiency gains.

SPTs must be time-bound, measurable, and clearly defined, with intermediate milestones where appropriate. DFCC will not include SLLs with weak, backward-looking, or non-transformational targets in the eligible SLL portfolio.

## 2.5.2 Key Performance Indicators and Sustainability Performance Targets

| Key Performance Indicators (KPIs)  |   | Calibration of Sustainability Performance Targets (SPTs)  | SPT Coverage  | SDG Linkage   |
|--|---|---|---|---|
| <b>Core KPIs</b><br>Selected eligible Sustainability-Linked Loans must have at least one Core KPI. The Core KPI(s) directly addresses borrower's GHG Emissions | <ul style="list-style-type: none"> <li>• Scope 1 &amp; 2 GHG emissions               <ul style="list-style-type: none"> <li>- For borrowers where Scope 1 and 2 emissions represent 40% or more of the GHG emissions</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>• <b>Emission Reduction Scope</b> <ul style="list-style-type: none"> <li>- Emission reductions shall cover material scopes that deliver a significant and potentially transformational impact</li> </ul> </li> <li>• <b>Alignment with Climate Pathways</b> <ul style="list-style-type: none"> <li>- There must be an alignment with the Paris Agreement objectives and follow either a 1.5°C pathway or the World Bank 2°C trajectory, applied to the relevant carbon emission scopes</li> </ul> </li> <li>• <b>Level of Ambition</b> <ul style="list-style-type: none"> <li>- There should be a demonstration of a strong level of ambition by meeting one or more of the following criteria:                   <ul style="list-style-type: none"> <li>○ Exceeding recognized benchmarks;</li> <li>○ Aligning with borrower's best-in-class peers;</li> <li>○ Representing a substantial improvement over the borrower's historical performance in accordance with the KPI;</li> <li>○ Aligning, where applicable, with a science-based trajectory consistent with the KPI.</li> </ul> </li> </ul> </li> </ul> | At least 95% of Scope 1 & 2 emissions (measured by absolute or intensity targets)   |  |
|  | <ul style="list-style-type: none"> <li>• Scope 1, 2 &amp; 3 GHG emissions</li> </ul>  |   | At least 90% of Scope 1,2 & 3 emissions (measured by absolute or intensity targets) |  |

### Secondary KPIs

These are KPIs addressing additional sustainability, social, and productivity topics. The KPIs should align with material aspects that are significant to the borrower's operations e.g., water management, waste and circularity, biodiversity and nature, pollution control, supply chain practices, health and safety, digitalisation etc. Additional climate-related KPIs that do not meet the criteria for Core KPIs may be included as Secondary KPIs. By incorporating multiple sustainability dimensions, Sustainability-Linked Loans with Secondary targets enable a more holistic transition strategy and deliver broader benefits for investors. The use of Secondary KPIs is at DFCC Bank's discretion and is not limited by the Sustainability Bond Framework.

### Notes

1. For clients where Scope 3 is extremely difficult to measure or there are industry-specific standards, this can be measured using a proxy with a best effort approach
2. SPTs shall be selected to address issues that are fundamental and material to the borrower's business or sustainability strategy. These include, but are not limited to;
  - **Climate-related targets:** Indicators that measure progress on material GHG emissions reduction or energy efficiency improvements
  - **Business-specific sustainability targets:** Indicators that reflect commitments to resource efficiency, biodiversity and nature conservation, pollution prevention and reduction, promote health and safety, digitalisation etc.
3. SPTs shall represent a meaningful improvement beyond business-as-usual and be calibrated relative to the borrower's historical performance, peer benchmarks, and, where relevant, science-based pathways. Backward-looking or purely relative targets without a credible transition trajectory shall not be considered eligible.

## 2.6 Process for Project Evaluation & Selection

### New Projects:

Applications for funding are initially screened against the Bank's 'Exclusion List'<sup>13</sup> and credit evaluations will be performed by lending units. The lending units will then recommend to the Sustainability Department certain green and/or social projects as suitable to be financed by the proceeds of the Green/Blue/Social/Gender/Sustainability/SLLBs issued under this framework. The Sustainability Department will screen the recommended projects against the Bank's E&S safeguard standards and evaluate the projects for eligibility under the framework as described in 2.1 above. Once screened, the projects will be earmarked by the Sustainability Department for financing by the proceeds of the Green/Blue/Social/Gender/Sustainability/SLLB. Thereafter, the Integrated Risk Management Department will carry out an overall risk evaluation and submit the credit facility for approval by the Board of DFCC Bank or the relevant delegated authority.

### Refinancing of Existing Projects:

Existing projects proposed for refinancing will be recommended by the lending units and evaluated for eligibility under the Sustainable Bond framework by the Sustainability Department. Thereafter, they will be earmarked for financing by the proceeds of the Green/Blue/Social/Gender/Sustainability/SLLB.

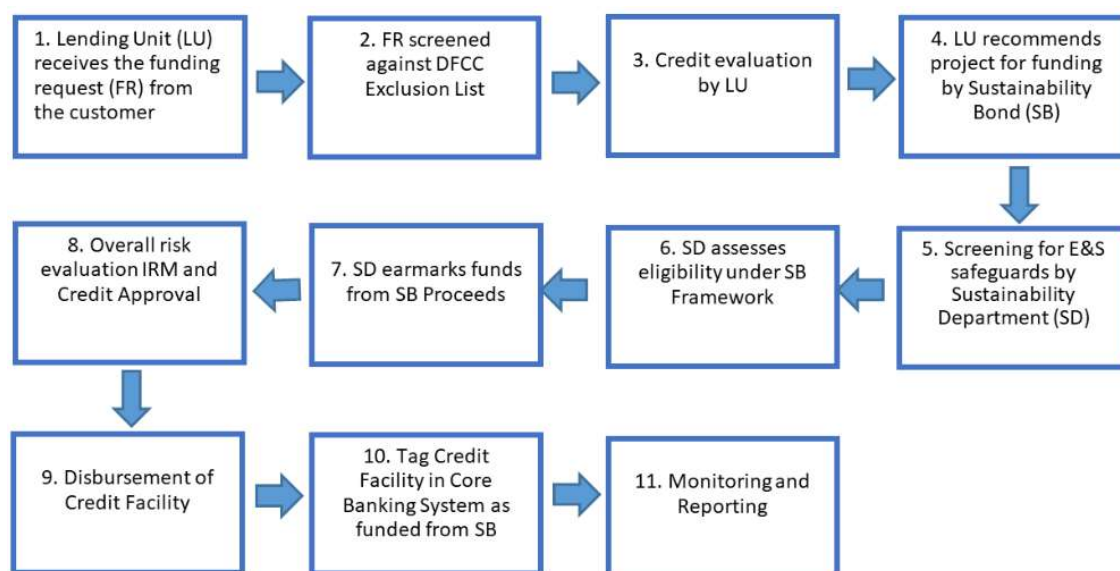

Figure 4: Process Flow

If any funded project fails for any reason, be it technical, managerial, regulatory or other; the project will be removed from the funding allocation and replaced with another project as proposed by the lending unit and approved by the Sustainability Department. The Bank will also ensure that all projects are in continued compliance with E&S safeguards as per the ESMS, during the life of the financing facility. If any E&S issues arise from any funded project, the borrower shall be requested to take corrective action in accordance with the provisions of the loan agreement, and if the matters are yet unresolved, it shall be replaced by another project. The overall assessment and selection of eligible projects will be carried out in accordance with the supplementary internal process document established under the framework.

<sup>13</sup> Please refer Annex 1 - DFCC Exclusion List

### **Sustainability-Linked Loans Financing**

Notwithstanding the procedure enumerated above, when assessing SLLs, the following additional aspects are considered:

- the ambition level of the SPTs; and
- alignment of SPTs with the borrower's overarching sustainability objectives or strategy; and
- the benchmarking of SPTs; and
- borrower's proposed approach to achieving the SPTs

SLLs must demonstrate ambition by driving material improvements beyond business-as-usual. Targets should be clearly justified for their selection, and benchmarked against recognized standards, including science-based pathways (where applicable), peer and industry benchmarks, and the borrower's historical performance. All climate targets in DFCC's SLLs must be forward-looking, science-based (where applicable), and aligned with the Paris Agreement. Borrowers are required to set short and mid-term milestones toward their long-term transition, clearly outlining the applied scenarios and methodologies.

In addition to credit risk assessment, DFCC shall evaluate the relevance and materiality of the selected KPIs, the ambition and calibration of the SPTs, their alignment with the borrower's sustainability strategy, and the credibility of the transition plan.

DFCC will ensure that an amount equal to the net proceeds of SLLBs is continuously allocated to eligible SLLs. To manage portfolio dynamics such as loan amortisation, prepayment, or exclusion due to non-achievement of SPTs, DFCC will maintain a sufficiently sized and diversified pipeline of eligible SLLs. If an eligible loan amortises, is prepaid, or is removed from the portfolio due to non-performance, it will be replaced with another qualifying SLL. Replacement shall occur on an annual basis or, if required, on a quarterly basis to maintain compliance with portfolio requirements. Pending reallocation, any temporarily unallocated proceeds will be managed in accordance with section 3 below. This approach ensures ongoing compliance with the SLLFB use-of-proceeds requirement and preserves portfolio-level sustainability integrity.

Eligibility assessments will be conducted prior to inclusion in the SLLFB portfolio and reviewed annually. If an eligible SLL fails to meet its SPTs at the observation date, it will be removed from the eligible portfolio until compliance is restored, in line with DFCC's internal procedures.

### **3. MANAGEMENT OF PROCEEDS**

The proceeds of the Green/Blue/Social/Gender/Sustainability/SLLBs will be managed by DFCC's Treasury, and fund allocations to specific projects will be done by the Treasury following specific recommendations from the Sustainability Department. The Treasury will maintain a schedule of projects that are financed and/or refinanced with the proceeds of the Green/Blue/Social/Gender/Sustainability/SLLB. Once disbursed, the Credit Services Department will tag the earmarked projects in the Bank's core banking system.

The unallocated proceeds of the Green/Blue/Social/Gender/Sustainability/SLLBs will be temporarily invested in cash, cash equivalents or Sri Lanka Government securities on a per

Green/Blue/Social/Gender/Sustainability/SLLB basis, in accordance with the Bank's cash management policies. Any unallocated proceeds will not be directed toward activities or financial instruments that conflict with the bond's environmental and social objectives, such as investments in fossil fuels or those listed on the exclusion list. The unallocated proceeds will be tracked in a separate internal accounting system. It is expected that the Green/Blue/Social/Gender/Sustainability/SLLB proceeds will be fully allocated within a period of 18 months from the date of bond issuance.

Refinancing of Eligible Projects will have a look-back period of no longer than 3 years from the time of issuance of each bond. Additionally, no more than 60% of the net proceeds from the bond issuance will be allocated to the refinancing of existing eligible projects.

The Bank will follow internal procedure manuals for the management of proceeds.

## **4. REPORTING**

The Treasury and the Sustainability Department will prepare and submit allocation and impact reports to the ESMC and to the Board on a yearly basis. Any changes to the overall portfolio considered under the Green/Blue/Social/Gender/Sustainability/SLLB, or removal and addition of individual projects from the Green/Blue/Social/Gender/Sustainability/SLLB portfolio will have to be cleared by the Sustainability Department.

DFCC will publicly disclose the allocation of proceeds and impacts of the Green, Blue, Social, Gender, Sustainability and SLLBs in its Annual Report on an aggregate portfolio basis and will not include details of individual projects funded. The proportion of allocation of proceeds by bond category will be included in the annual impact reporting. The Annual Report will be published on the DFCC Bank website ([www.dfcc.lk](http://www.dfcc.lk)) and the Colombo Stock Exchange website ([www.cse.lk](http://www.cse.lk)).

DFCC will make and keep, readily available, up to date information on the use of proceeds to be reviewed annually on a timely basis in case of material developments.

### **4.1 Allocation Reporting**

A detailed internal report will be generated by the Treasury and prepared together with the Sustainability Department on a quarterly basis until full allocation of proceeds, and thereafter on an annual basis. The following information will be included in the internal report:

- List of projects to which the Green/Blue/Social/Gender/Sustainability/SLLB proceeds have been allocated, with specific information related to the projects, allocated amounts, etc.
- Proportion of new and refinanced projects
- Remaining unallocated proceeds

### **4.2 Impact Reporting**

DFCC will use quantitative and qualitative performance measures and disclose key underlying methodology and/or assumptions used in the quantitative/qualitative determination. DFCC will also refer to and adopt, where applicable, the guidance and impact reporting template provided in the ICMA

Harmonized Framework for Impact Reporting (June 2024)<sup>14</sup> and the ICMA Harmonized Framework for Impact Reporting for Social Bonds (June 2025)<sup>15</sup>. The impact of each funded project will be measured by collecting data annually and reported on a portfolio basis. Table 2.5.1 above provides a summary of examples of *indicative* impact reporting metrics that could be disclosed against each eligible main category.

With respect to SLLBs, DFCC will establish a structured process for ongoing monitoring and reporting of the eligible SLL portfolio. Borrowers are contractually required to provide third party verified periodic sustainability performance data in accordance with the agreed KPIs and SPTs, typically on an annual basis and aligned with the observation dates specified in the loan documentation. Data collection is coordinated by the lending units and reviewed by the Sustainability Department, which assesses performance against SPTs and maintains consolidated portfolio-level records. DFCC will monitor progress throughout the loan tenure and identify any loans that fail to meet their applicable SPTs at the observation date. DFCC will report annually on an aggregated basis, including information on KPI categories, proportion of loans achieving SPTs, sectoral distribution, and changes to the eligible portfolio. Where confidentiality or portfolio size considerations apply, information will be presented in a generic or aggregated format.

## 5. EXTERNAL REVIEW

DFCC will verify this Sustainable Bond framework from a reputed Independent External Verifier or Second Party Opinion provider, confirming its alignment with the Green Bond Principles (GBP) (June 2025), Bonds to Finance the Sustainable Blue Economy: A Practitioner's Guide (September 2023), Social Bond Principles (SBP) (June 2025), Bonds to Bridge the Gender Gap: A Practitioner's Guide to Using Sustainable Debt for Gender Equality (November 2021), Sustainability Bond Guidelines (SBG) (June 2021) issued by the International Capital Market Association (ICMA), the Guidelines for Sustainability-Linked Loans Financing Bonds (SLLBG) (June 2024) issued by the Loan Market Association (LMA) and the International Capital Market Association (ICMA), the Sustainability-Linked Loan Principles (SLLP) (March 2025) issued by the Asia Pacific Loan Market Association (APLMA), the Loan Market Association (LMA) and the Loan Syndications and Trading Association (LSTA), and the Sri Lanka Green Finance Taxonomy (May 2022) issued by the Central Bank of Sri Lanka where applicable, prior to a Green, Blue, Social, Gender, Sustainability or SLLB issuance.

The Independent External Verifier will also issue a Post Issuance Assurance Report. The Post Issuance Assurance will include a review of the internal processes and controls, allocation reports and impact reports, and will be performed after 12 months following the issuance of the Green/Blue/Social/Gender/Sustainability/SLLB.

Thereafter, the annual allocation reports and impact reports will be reviewed by the Independent External Verifier. These reports in abridged form, including the external review, will be published in the DFCC Bank website.

With respect to SLLBs, DFCC will ensure the credibility and integrity of SLLs included in the SLLB portfolio through appropriate verification mechanisms. Borrowers are generally required to obtain independent

---

<sup>14</sup> <https://www.icmagroup.org/assets/documents/Sustainable-finance/2024-updates/Handbook-Harmonised-Framework-for-Impact-Reporting-June-2024.pdf>

<sup>15</sup> <https://www.icmagroup.org/assets/documents/Sustainable-finance/2025-updates/Handbook-Harmonised-Framework-for-Impact-Reporting-for-Social-Bonds-June-2025.pdf>

sustainability confirmation statements, assurance reports, or equivalent verification covering performance against the relevant KPIs and SPTs. Where borrowers already publish externally assured annual sustainability or integrated reports that cover the applicable KPIs and observation periods, DFCC may rely on such existing verification, subject to internal review. In cases where such assurance is not available or does not sufficiently cover the loan-specific targets, DFCC may require separate third-party verification or confirmation statements. DFCC will disclose, at the portfolio level, the proportion of SLLs supported by external verification and the general nature of the assurance obtained.

## **6. UPDATING OF THE SUSTAINABLE BOND FRAMEWORK**

DFCC Bank will update this framework as and when required, and such updates will be published on its website. These changes will follow DFCC's internal processes and the relevant globally recognized standards, guidelines and best practices.

## ANNEX 1: DFCC EXCLUSION LIST

1. Production or activities involving harmful or exploitative forms of forced labor<sup>16</sup> / harmful child labor<sup>17</sup> and human rights abuses (including that of indigenous and / or vulnerable groups)
2. Production of or trade in any product or activity deemed illegal under host country laws or regulations or international conventions and agreements, or subject to international phase-outs bans, such as pharmaceuticals, pesticides and herbicides, ozone depleting substances, polychlorinated biphenyls (PCB's)<sup>18</sup> and other hazardous chemicals, wildlife or wildlife products regulated under CITES (Convention of International Trade in Endangered Species of Wild Fauna & Flora) and Trans-boundary trade in waste or waste products.
3. Production or trade in weapons and munitions<sup>19</sup>, including military equipment financing.
4. Gambling, casinos and equivalent enterprises<sup>19</sup>
5. Production or trade in radioactive materials<sup>20</sup>
6. Production or trade in un-bonded asbestos fibers<sup>21</sup>
7. Commercial logging operations or the purchase of logging equipment for use in primary tropical moist forests or old-growth forests, deforestation and land clearance by burning
8. Marine and coastal fishing practices, such as large-scale pelagic drift net fishing and fine mesh net fishing, harmful to vulnerable and protected species in large numbers and damaging to marine biodiversity and habitats and / or use of any other illegal fishing methods, e.g. dynamite fishing
9. Ethically / morally controversial projects / activities, e.g. animal testing, sex trade, abortions, money laundering, terrorist financing, human trafficking, arms smuggling
10. Adversely affecting UNESCO World Heritage Sites or national and / or international protected areas and wetlands
11. Coal power plants

**Advances to the above activities/sectors are prohibited.**

---

<sup>16</sup> All work or service, not voluntarily performed, that is extracted from an individual under threat of force or penalty

<sup>17</sup> Employment of children whose age is below the country's statutory minimum age of employment or employment of children that is economically exploitive, or is likely to be hazardous to, or to interfere with, the child's education, or to be harmful to the child's health, or physical, mental, spiritual, moral, or social development

<sup>18</sup> A group of highly toxic chemicals, polychlorinated biphenyls are likely to be found in oil-filled electrical transformers, capacitors, and switchgear dating from 1950 to 1985

<sup>19</sup> This does not apply to project sponsors who are not substantially involved in these activities. "Not substantially involved" means that the activity concerned is ancillary to a project sponsor's primary operations

<sup>20</sup> This does not apply to the purchase of medical equipment, quality control (measurement) equipment and any equipment where IFC considers the radioactive source to be trivial and/or adequately shielded

<sup>21</sup> This does not apply to purchase and use of bonded asbestos cement sheeting where the asbestos content is less than 20%
